

How to repack your Shell-Clad™ exhibition graphics after use

Storing

Roll Panels should not be stored tightly rolled. We recommend leaving a 100mm diameter air core, ie three panels max. per 300mm diameter storage tube.

Important: When packing panels do NOT drop them down into the tube as the outside edge of the graphic will catch on the velcro of any panel already in the tube and may damage it. Simply roll the panel as you would a poster, lower carefully into the packing tube and then release, letting the panel expand to a wider diameter.

Once all the panels are in the tube, please pack with bubblewrap or the like to prevent the panels from shifting during transit.

GRAPHICS MUST ALWAYS BE STORED WITH THE IMAGE FACING OUTWARDS.

WARNING: *Shell-Clad is designed to attach graphics and similar lightweight materials to a shell scheme. Do not attempt to hang heavy objects with Shell-Clad.*
