

IMPORTANT INFORMATION

For the attention of the Electrical Contractor
Reference power sockets and junction boxes

Important

We are dressing our shell scheme stand with graphics using the Shell-Clad system (see www.shell-clad for details).

Shell-Clad enables us to fully clad the walls on our stand with seamless graphics, thereby eliminating (from view) the complete shell scheme structure.

This is achieved by applying graphics to the shell scheme using Shell-Clad uprights, which simply clip in and out of the pillar/pole grooves (see illustrations).

As we have ordered powerpoint(s) on our stand, could we please ask that these are installed with sufficient cable for the socket(s) to rest on the floor as we won't be able to access the sockets if they are wall mounted - due to the wall graphics.

For the same reason, could you please ensure that our walls are free of the large junction boxes that you occasionally see on shell schemes.

If you have any questions / concerns, please contact either ourselves or Shell-Clad on 01825 750 699.
